

Brand Standards and Production Guide

A locked identity system for web, print, signage, apparel, documents, and vendor production.

VERSION 1.6

Source of Truth

The four production masters control the Faith Reins identity.

HORSE ICON

Standalone symbol.

PRIMARY HORIZONTAL

Website headers and wide applications.

STACKED DOCUMENT

Documents and constrained placements.

OFFICIAL SEAL

Formal and ceremonial applications.

MASTER ARTWORK

Use the supplied SVG masters. Do not redraw or reconstruct.

Brand Character

What the system should communicate in every application.

STRENGTH

Confident and capable without becoming aggressive.

TRUST

Disciplined geometry and restrained typography communicate credibility.

WARMTH

Cream, warm gold, and authentic equestrian imagery keep the brand approachable.

MODERN HERITAGE

Traditional equestrian cues are simplified into a clean contemporary system.

LOGO STANDARDS

Primary Horizontal Logo

Default for website headers, wide signage, sponsorships, and general communications.

LOCKED INTERNAL SPACING

Horse-to-title horizontal gap: 50 pt. The horse must never enter the protected text box. Divider rules stay within the width of FAITH REINS.

TAGLINE SYSTEM

EQUESTRIAN CENTER remains centered under the title. Both divider rules maintain visible margin from the tagline and never extend beyond the title width.

Stacked Document Logo

Compact vertical identity for documents, folders, cards, and constrained placements.

FAITH REINS

— EQUESTRIAN CENTER —

LOCKED PROPORTIONS

Horse visual width = 60% of FAITH
REINS visual width. Horse is
mathematically centered over the title.

VERTICAL RHYTHM

Title-to-tagline visual gap = 39.7 pt.
Tagline and rules use the same
treatment as the horizontal system.

Official Seal

The formal mark is governed by a mathematical construction system.

TYPE

Noto Serif SemiBold (600); production seal type is outlined.

GOLD STROKES

Inner gold circle = 6 pt. Side divider arcs = 6 pt.

TEXT GEOMETRY

True circular paths only. No elliptical scaling.

OPTICAL RADIUS

Text and divider optical centerline: $R = 336$ on a 1000 x 1000 system.

EXCLUSION RULE

No text glyph may touch or cross any gold line. Maximum text radius: $R = 392$.

COLOR VARIANTS

Color may change; geometry may not.

Color System

Natural, warm, and restrained. Forest Green is the primary identifier.

FOREST GREEN

#0B4F3A
RGB 11, 79, 58
CMYK 86 0 27 69
Primary

WARM GOLD

#C9A96B
RGB 201, 169, 107
CMYK 0 16 47 21
Accent

CREAM

#F6F1E7
RGB 246, 241, 231
CMYK 0 2 6 4
Light field

BLACK

#111111
RGB 17, 17, 17
CMYK 0 0 0 93
Monochrome

WHITE

#FFFFFF
RGB 255, 255, 255
CMYK 0 0 0 0
Reverse

COLOR USE

Warm Gold is an accent, not a replacement primary. Use Forest Green on Cream for the default institutional expression.

Typography

Production logo lettering is artwork. Supporting typography is standardized separately.

LOGO WORDMARK

FAITH REINS is outlined vector artwork. Do not re-typeset it.

NOTO SERIF SEMIBOLD

Formal headings and seal typography.

NOTO SANS

Body copy, navigation, UI, captions, and utility text.

PRODUCTION RULE

Do not attempt to reproduce the official wordmark from a font file. The approved SVGs contain the locked lettering and spacing.

SEAL Q CHARACTER

Noto Serif SemiBold has the restrained capital Q tail established in the locked reference.

LOGO STANDARDS

Approved Color Variants

Geometry never changes between variants.

	FOREST GREEN	WARM GOLD	BLACK	WHITE
HORSE				
HORIZONTAL				
STACKED				
SEAL				

APPROVED COLORS

Forest Green, Warm Gold, Black, and White.

MASTER GEOMETRY

Apply color changes to the approved masters. Do not adjust spacing, typography, proportions, or circular geometry.

Clear Space and Minimum Reproduction

Internal relationships are locked. External clear space protects recognition.

EXTERNAL CLEAR SPACE

Maintain at least 10% of the total logo height on every side, in addition to the locked 50 pt internal horse-to-title gap.

MINIMUM SIZES

Horizontal: 180 px digital / 1.5 in print.
Stacked: 140 px digital / 1.25 in print.
Horse: 24 px high / 0.35 in print. Seal:
120 px digital / 1.25 in print.

DIGITAL APPLICATIONS

Website Header

The primary horizontal logo leads digital navigation.

NAVIGATION

Use the primary horizontal logo in navigation; maintain clear space and strong legibility.

HEADER PROPORTIONS

Keep the header shallow and allow the brand mark to remain clearly legible.

COLOR

Use Forest Green, Cream, and restrained Warm Gold accents for buttons and utility UI.

Website Homepage

The horizontal logo anchors a clean, image-led digital experience.

LOGO PLACEMENT

Use the locked primary horizontal logo in the navigation header.

PHOTOGRAPHY

Use warm, authentic equestrian photography with natural light. Imagery should feel human-centered rather than corporate or stock-heavy.

INTERFACE

Use Forest Green, Cream, and restrained Warm Gold accents for buttons and utility UI.

Documents and Business Cards

Printed communication should feel refined, tactile, and consistent.

DOCUMENT STANDARD

Use the document logo on stationery and formal correspondence. Prefer generous margins, matte paper stocks, and restrained color application.

BUSINESS CARD STANDARD

Use one clear brand expression per side. Avoid duplicate watermark icons competing with the main mark.

Full Page Document

A formal letterhead system with clear hierarchy and generous white space.

LOGO PLACEMENT

Use the stacked/document logo at the upper left.

UTILITY INFORMATION

Place address and utility information opposite the logo without competing with it.

WATERMARK

A low-opacity horse watermark may be used as a secondary decorative element.

BODY COPY

Keep body copy neutral and highly legible; brand expression comes from the header, rule, and watermark.

Business Card

Cream and Forest Green treatments using the locked identity system.

LOGO USE

Use the approved horizontal logo once per side. Do not add a duplicate horse watermark.

HIERARCHY

Keep the brand mark separate from contact information.

FINISHES

Use restrained finishes: cream stock, Forest Green, and optional gold foil.

Signage and Apparel

The official seal provides a formal identity for building and garment applications.

SIGNAGE

Mount the seal flat against the wall. Conceal all supports; do not use a visible bracket or projecting arm.

PRODUCTION

Use locked geometry throughout. A one-color cream treatment is preferred for apparel.

APPAREL

Use the seal on the shirt back and the stacked/document logo on the left chest.

Building Sign

The formal seal sits flat against the wall for exterior applications.

MOUNTING

Mount the sign flat against the wall. Keep all supports concealed. No visible bracket or projecting arm.

ARTWORK

Use the approved seal without altering proportions or circular geometry.

FINISH

Maintain Forest Green, Cream, and Warm Gold.

FABRICATION

Use the supplied vector master for fabrication; the photograph is a usage example.

Tee Shirt Front and Back

Large reverse seal on the back and a small stacked logo on the left chest.

BACK PLACEMENT

Use the seal as a large centered back graphic. Preserve the full circular composition and text clearances.

FRONT PLACEMENT

Use a small stacked/document logo on the left chest.

COLOR

One-color cream is the preferred apparel execution for screen print and embroidery simplification.

Merchandise Family

Forest Green, Cream, Warm Gold, tactile materials, and restrained marking.

LOGO SELECTION

Do not invent product-specific logos. Choose among horse, horizontal, stacked, and seal masters.

SECONDARY GRAPHICS

Use subtle oversized horse watermarks only as secondary decorative graphics.

CONSISTENCY

Carry the same palette and logo family across apparel, drinkware, folders, and soft goods.

Boutique Merch Stand

An in-building 8 ft x 8 ft merchandise wall using the same identity system.

IDENTITY

Use the same locked logo family across apparel, drinkware, and display graphics.

PALETTE

Pair cream and Forest Green garments with a warm equestrian retail finish.

FIXTURE MATERIALS

Use real hardwood, soft brass, and illuminated shelves rather than generic racks.

DISPLAY

Keep the display tidy. Oversized decorative marks may appear on a distinct product or sign.

Incorrect Use

Consistency is a production requirement.

DO NOT

Redraw, trace, or regenerate the horse.

DO NOT

Change the 50 pt horse-to-title spacing in the horizontal mark.

DO NOT

Extend tagline rules beyond the FAITH REINS title width.

DO NOT

Distort circles into ellipses in the seal.

DO NOT

Let seal text touch or cross a gold line.

DO NOT

Change the 6 pt gold stroke system or substitute another serif in the seal.

DO NOT

Stretch, skew, rotate, outline, shadow, or add effects.

DO NOT

Alter geometry when creating color variants.

Vendor Handoff and Asset Selection

Use this matrix to choose the correct master before production.

APPLICATION	MASTER	FORMAT
Website / navigation	Primary Horizontal	SVG
Formal document	Stacked / Document	SVG or vector PDF
Building sign	Official Seal or Primary Horizontal	SVG or vector PDF
Embroidery / hat	Horse or one-color Horizontal	SVG
Large shirt back	Official Seal	SVG
Shirt left chest	Stacked / Document	SVG
Business card	Primary Horizontal	SVG or vector PDF
Social avatar / favicon	Horse	SVG / PNG export

CHANGE CONTROL

The masters are locked. Changes to horse geometry, wordmark spacing, stacked proportions, seal typography, seal radii, gold stroke weight, or core palette require a new approved brand-system version.
