RELEASE AND REVIEW

A portable handoff.

Copy the extracted v7-design-system folder into the repository when you are ready.

Open offline

index.html provides the visual guide and searchable catalog. No account or build step is needed.

Validate

scripts/validate.py checks identity/product hashes, counts and active links.

Export repository assets

scripts/export-repo-assets.py explicitly creates the requested root image/catalog destinations and refuses differing collisions.

Integrate separately

Shared logo markup, public asset paths and token integration belong in a reviewed website change.

Finish practical QA

Test real responsive widths, keyboard behavior, contrast, print output, embroidery and supplier specifications.

Preserve the originals

Source images and approved SVG masters remain untouched. New documentation and template compositions await owner review.
